

PNEUMATIC CONTROL VALVES PV926

(V926 angle valves series with linear actuators PA series)

DESCRIPTION

The PV926 control valves are single seated, two-way body constructed with angle connections. The PA pneumatic actuator is rubber diaphragm and multisprings. It's action can be DA - direct action (air to close) or RA-reverse action (air to open). The PV926 valves have been designed to assure an accurate control in any process condition. The self draining design is ideally suited to applications in clean steam service.

MAIN FEATURES

Single seated, two way, direct or reverse action valve. Valve top flange permanently attached to the body, removal is unnecessary for replacing the actuator. Metal to metal or soft sealing.

Self draining design

STANDARD SURFACE FINISH

Internal parts: 0,5 microns Ra

External: Body

Fine machined (mechanical or electro polished as

option) Actuator

Stainless steel satin bead blast finish - 1,6 microns Ra

Steel painted

OPTIONS: Soft sealing

Position transmitter
Pneumatic pilot positioner

Air filter regulator

Top-work manual handwheel

USE: Saturated steam

Hot and superheated water

Air and gases compatible with the

construction

AVAILABLE

MODELS: PV926

VALVE SIZES: DN1/2" to DN2"; DN15 to DN50

CONNECTIONS: Clamp ends or other on request

PNEUMATIC

ACTUATORS: PA-205,PA-280,PA-340,PA-435

ACTUATOR CONN: 1/4" NPT-F

CONTROL SIGNAL: 0.2 - 1bar; 0.4 - 1.2 bar; 0.4 - 2 bar

ELECTRIC ACT.: Consult catalogue IS EL20.00 E

HOW TO SELECT: Never size the valve according to the pipe diameter in which it has to be fitted, but according to the required actual flow of steam or water. Refer to the valve calculation data sheet or consult the factory.

MAX.AIR SUPPLY: 3,5 bar

AMBIENT

TEMPERATURE: -20°C+70°C

STEM SEALING: VITON/PTFE O-Rings 170°C

PLUG TYPES: Equal percentage (EQP)

Linear (PL) On-Off (PT)

PORT: Full port as standard

PN 16

DN1/2" to DN2"

Reduced or microflow on

request

CE MARKING (PED - European Directive 97/23/EC)

Category

SEP - art. 3, paragraph3
